SUMMARY

AI Engineer and final-year B.Tech CSIT student (graduating 2027) building production agentic AI and RAG systems. Published an **SDK on PyPI**, built an **MCP server integrating 5 external APIs**, and delivered AI and backend products for **3 international clients** as the sole engineer.

EXPERIENCE

Founding Engineer | TypeThink AI *Apr 2026 – Sep 2026*

- Built backend pipelines and **MCP servers exposing 8 tools** for skill search, profile lookup, and candidate matching in a skills marketplace.
- Deployed the Astro-based website and APIs on **Cloudflare Workers** with **D1 database migrations**.

Agentic AI Intern | BlockX *Jul 2025 – Dec 2025*

- Built and published the **blockxai SDK on PyPI**, providing reusable APIs for multi-agent orchestration and **reducing agent development time by 40%**.
- Developed an **MCP server integrating 5 external APIs and webhooks**, and built a **RAG conversational engine** using vector retrieval and structured document indexing.

Freelance AI & Backend Engineer | Self-employed *Jan 2024 – Dec 2025*

- Sole engineer for **3 international clients** (Compliledger, Omelo, CoinX), owning delivery from requirements to production.
- Built **autonomous trading agents for CoinX** monitoring **20 trading pairs on a 30-second signal refresh**, combining LLM reasoning with live market APIs over WebSockets.

PROJECTS

AI Agent Observatory | *Astro*, *React Three Fiber*, *Three.js*, *Groq*, *PostgreSQL/pgvector*, *SSE*

- Built a **3D observability and evaluation platform** for a **12-node AI agent pipeline**; benchmarked **30 queries** at a **10.96 s mean end-to-end latency** and identified **tool execution as the slowest stage (3.60 s average)**.
- Added **claim-level verification**: **116 claims evaluated, 2 flagged unsupported** among 95 checked against web sources; the benchmark also exposed a **ranking bug where responses with zero extracted claims scored as fully supported**.

Nexus.AI | *Next.js*, *Express*, *MongoDB*, *LangGraph*, *Gemini 2.5 Flash*, *WebSockets*, *Web Speech API*

- Built a **multi-agent mock interview platform** (2 live versions) on **LangGraph**, where an **LLM evaluator scores each answer** and **adapts question difficulty (Easy/Medium/Hard) in real time**.
- Added **two-way voice interviews** using **neural speech synthesis** and the **Web Speech API**, with **live clarity and confidence tracking** for a hands-free experience.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL

AI & Agents: LangGraph, LangChain, CrewAI, RAG, multi-agent systems, MCP, embeddings and semantic search, prompt engineering

Backend & Real-Time: FastAPI, Flask, Node.js, Express, REST APIs, WebSockets, SSE, webhooks, OAuth

Frontend: React, Next.js, Astro, Tailwind CSS

Databases & Vector Stores: PostgreSQL (pgvector), MongoDB, Redis, FAISS, ChromaDB

Cloud & DevOps: Docker, AWS (EC2, Lambda), Cloudflare Workers and D1, Render, Vercel, Git, CI/CD

EDUCATION

Acropolis Institute of Technology and Research (AITR), Indore *2023 – 2027*
B.Tech in Computer Science and Information Technology (CSIT) **CGPA: 7.71**

CERTIFICATIONS & ACHIEVEMENTS

- **Published research paper** on Krishi Setu, an IoT-based agricultural system, at **NSSAFE 2025**.
- **Finalist**, Logitech “Aspire for Her” Women’s Hackathon.
- **1st place**, ThinkTank Ideation, organized by IEEE.
- **Google Cloud Certification** in Generative AI.
